

CAD draftsman with Revit experience

General contractor seeking a detail-oriented person with excellent communication skills and an overall friendly professional demeanor.

Must possess the following qualifications:

- Architectural background and knowledge of building design and construction is a must.
- Must be proficient with Autodesk Revit (minimum two years' experience)
- Must be proficient with AutoCad architecture (minimum two years' experience)
- Must have experience with preparing architectural construction documents for residential and commercial projects
- Needs to be familiar with local and national building codes
- Must have experience with Microsoft Office applications
- Experience with 3DS Max is a plus

Person will be producing construction documents for submittal to local building departments to secure building permits, corresponding with sub-contractors to receive and answer requests for additional information, and other items as needed.

Position is fulltime Monday - Friday 8:00 A.M. - 5:00 P.M. Compensation to be commensurate with experience. Benefits include health insurance, paid holidays, vacation and sick time.
